CMS Overview

Session #1

Offender Data & To Do List : *This demonstration will cover the main offender data pages designed for the new web-based version of the Adult Probation software.*

Modules shown during this demonstration will include the initial offender data screen, personal information, aliases, addresses, phone numbers, medical information, physical description, relationships and alerts.

Session Leader(s) - Ed Adams

CMS Overview

Session #2

Background: *This session will include a demonstration of the design layouts for the offender background and history screens in the web-based version of the Adult Probation software. Modules covered during this demonstration will include offender background information on education, employment, financial data, gang relations, military experience, miscellaneous IDs, driver's license, vehicle information and weapons. The demonstration will also cover screens for the offender's jail history, prior record, previous release, transfer status, IP history and legacy file storage locations.*

Session Leader(s) - Erica Sankey

CMS Overview

Session #3

Dockets & Case Notes: *This demonstration will cover the new docket-based sentencing module for the web-based version of the Adult Probation software. It will include the organization of the offender's offenses, sentences and special conditions. It will also cover the docket archive for organizing legacy docket information.*

Session Leader(s) - Josh Dom

Schedule / TODO Module

This screen was created to have a very effortless date tracking screen for the officer. This screen is based per offender. There are few fields that need to be used. A field to type an explanation of the task. A date started field and a date completed field. And we will show a number of reports that can be created for the officer and the county.

Session Leader(s) - Brendan Harker

Crystal Reports

This session is designed for users with little or no experience with Crystal Reports but who have the need to generate reports based on data available to them. Although no database experience is necessary, some of the concepts may be more meaningful if the user has worked with database applications before

Session Leader(s) - Ed Garlena
