

Digital Solutions/Inmate Telephone, Inc.

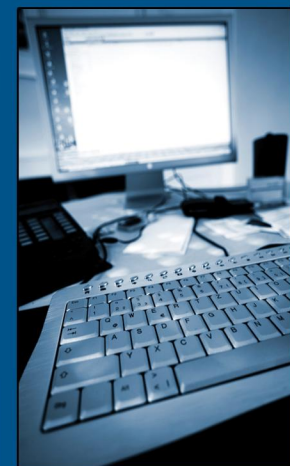

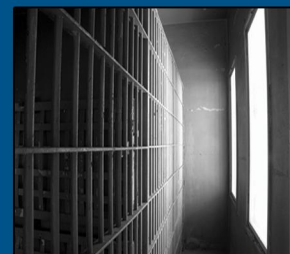

Offender Communication System

Offender Communication System (OCS) is the most configurable state of the art phone system available in the market today. Through superior engineering, we have built a system that does so much more than simply permit an inmate to make phone calls. Our system was designed to integrate directly into your existing network, giving anyone with the appropriate authorization the ability to access the application from the comfort of their own office. In fact, our phone systems can be networked together to support a complex of facilities across an entire country. Even better, we have built the system from the very beginning as an application that can be network accessed. The system can even be accessed through a secure Internet connection, should you choose to do so. Every function that is available from your desk is now available to you no matter where you are!

OCS is built to integrate with the industry's best offender management software, which means that you will never have to book or release inmates on both a phone system and the system that runs your facility. Bookings and releases in our software flow seamlessly from the offender management software to the phone system. Inmate phone transactions such as debit calls, commissary orders, and sick calls interact with our Offender Management System immediately, providing enough detail to satisfy the most exacting auditor.

Features & Capabilities

- Internet Ready
- Multiple Facility Functionality
- Call Recording
- Call Monitoring
- Call Alerts
- Profiles
- 3-Way Call Detection
- Schedules
- Call Blocking
- Allowed Numbers
- Commissary by Phone
- Inmate Sick Call
- Debit Calls
- Online Bill Payment
- Multiple Family Payment Option
- Unlimited Language Support
- Security
- Special Services
- Integration with OMS

Improve Your Experience
