

What's being missed by not monitoring inmate phone calls for criminal activity?

- Drugs?
- Escape?
- Weapons?
- Contraband?
- Gang Activity?
- Terrorist Recruitment?
- Undercover Agents Compromised?

Digital Solutions/Inmate Telephone, Inc.

Call IQ

The Intelligent Way to Monitor Your Calls

Fact: Only about 4% of all recorded inmate phone conversations are ever listened to.

It's no wonder that criminal activity still exists behind bars and is leaking back into our communities. But how do you cut down on these crimes? On average, for a 500 bed correctional facility, it would take approximately seventeen investigators to listen to all of the inmates' calls! That would represent a huge payroll expense listening to calls that may consist of nothing more than a call home to mom. So how do you listen to only calls that may contain criminal activity? Until Call IQ, you couldn't.

Call IQ is data mining at its finest! This tool is designed with correctional facilities in mind. Call IQ will save hours in investigations and reveal untold information that in the past went undiscovered.

- Save time investigating criminal activity
- Reduce crime in correctional facilities
- Catch criminals in the act
- Keep criminal activity out of correctional facilities
- Reduce time wasted by receiving results to related crimes
- Eliminate witness harassment
- Stifle gang and terrorist recruitment
- Discover escape plots
- Build the investigative dictionary to match local slang
- Receive email alerts when certain phrases are said
- View exactly where in the call the searched term was stated
- Proceed automatically to the point where the phrase was discussed
- Search results by importance and relevance
- Receive positive press for eliminating criminal activity
